## **Personal Laravel Project Description:**

I developed a system where a business owner can maintain his business by this system.

For example,

ABC Company is a small retail company, they purchase their products and sale the products with a profit margin. Currently they are managing their business manually, for that reason ABC Company is suffering to manage their stocks and sale management information, also the purchase information's on their products as they needed more time to summarize the result.

So, ABC wants an automation system which will manage their small business, and they will be able to manage their products, purchases, stocks and sales, with which they could have right data on time and with less effort.

**Roll played:** Researching, Writing and implementing code and managing project.

**Technology Used** : **PHP Laravel Framework, Ajax , JQuery, Bootstrap**
